PROFESSIONAL EXPERIENCE

Flutter Developer
Safe Software And Integrated Solutions Pvt Ltd
2023 - Present

- Lead a team to create top-notch mobile apps for iOS and Android using Flutter. Write clean, efficient code for quality results.

- Integrate mobile applications with backend services and third-party APIs,Fetch and display data in the app using asynchronous programming.

- Implement effective state management using Flutter's state management solutions , choose and implement the appropriate state management approach based on project requirements.

- use version control systems (Git) for codebase management.Collaborate with team members through version control platforms.

PROJECTS

PRIMA FINANCE

Mobile Banking Application

Safe Software And Integrated Solutions Pvt Ltd

- secure and convenient financial services accessible anytime, anywherethrough a mobile application.

GAS AGENCY

Application For Manage Gas Employee's works

Safe Software And Integrated Solutions Pvt Ltd

- Empowering gas agency employees to efficiently manage assigned repair tasks, navigate to customers' locations, complete repairs, and verify completion through a streamlined mobile application

LOAN RECOVERY

Application For Loan Recovery

Safe Software And Integrated Solutions Pvt Ltd

- Loan recovery APK is a centralized application catering to the unique needs of six banks. With a dynamic feature set, the app seamlessly adapts its functionality based on the registration of each bank, ensuring tailored solutions for effective loan recovery.

KARNATAKA VIKAS GRAMEENA BANK(SMA)

Application For Loan Recovery

Safe Software And Integrated Solutions Pvt Ltd

- A purpose-built platform designed to streamline and enhance transactional efficiency by comprehensively gathering information about both the property (land) and the customer, ensuring accuracy and efficiency in the data collection process

AGENT COLLECTION

Application For Collection From customers

Safe Software And Integrated Solutions Pvt Ltd

- An application enabling bank employees to collect payments from customers at their homes. Features include customer search by number or name,payment entry, amount updating, and customizable report generation in PDF and DOC formats, tailored to different bank requirements.

MICROFINANCE (MFI)

Application For Collection and Loan App

Safe Software And Integrated Solutions Pvt Ltd

- The MFI app is a personal loan application designed for bank employees to create customer profiles during home visits and request loans based on their collection details. It enables employees to view comprehensive reports and monitor collection statuses, streamlining the loan approval and management process

CLUB MANAGEMENT APP

Comprehensive KOT and BOT Solution

- The Club Management App is designed to streamline the operations of kitchen and bar outlets (KOT and BOT) and manage table reservations within a club. Registered members can access the club by entering their member number, which automatically retrieves their details. Members can conveniently place orders for food, drinks, and other services through the app, with the charges deducted from their balance. Administrators can log in to modify the app's URL, allowing different clubs to manage their unique settings and member data seamlessly. This app enhances the efficiency and accuracy of club operations, ensuring a smooth experience for both members and staff.

PASSBOOK APP

Mobile PassBook

Safe Software And Integrated Solutions Pvt Ltd

- Passbook is a comprehensive financial management app designed to provide users with easy access to their financial records and transactions. With Passbook, users can view their passbook transactions, manage their loan details, and keep track of their cards and associated transactions. The app also offers a wide range of utility payment options, including water bills, electricity bills, and mobile recharges, making it a one-stop solution for all financial needs.Passbook enhances user convenience with its integrated QR code system for receiving payments, a built-in QR scanner for swift transactions, and a voice command feature for hands-free operation. To ensure security, the app supports fingerprint verification for login, OTP verification for sensitive actions, and easy beneficiary creation for smooth transactions.This core application is built using Flutter Flavors, allowing different banks to generate their customized versions of the app. Each bank is identified by a unique firm ID, enabling the app to retrieve and display bank-specific features tailored to their customers' needs.
